PROFESSIONAL SUMMARY

Information Technology student seeking an OJT internship in software development. Project experience includes web applications and Python desktop software.

EDUCATION

BS Information Technology | STI College Lucena — 2023 - Present
Expected graduation: 2027
Senior High School | Quezon National High School — 2022 - 2023
High School | Quezon National High School — 2020 - 2021
Elementary | Jubilee Christian Academy — 2016 - 2017

PROJECT EXPERIENCE

Sevilla360 — misevillas.com
PHP, JavaScript, MariaDB, Panolens.js
- Contributed to a resort booking system with reservations, availability checks, and temporary date locks.
- Built a 360-degree virtual showroom with Panolens.js so visitors can explore venues before booking.
- Implemented manual payment submission and staff review workflows for reservation confirmation.

ARKTIESIIS — arklucena.com
Node.js, Express, EJS, MariaDB, Gemini API
- Contributed to a school information system with enrollment, finance review, and document-processing workflows.
- Implemented grade imports and staff review tools for student records and submitted documents.
- Added Gemini-assisted field extraction to support staff review of document contents.

HealthMate — healthmateplus.com
React, Vite, Express, PostgreSQL
- Contributed to a school clinic application for visits, appointments, and health records.
- Implemented guardian health-record submissions and nurse review of submitted requests.
- Applied role-based access checks across clinic and clinical-record workflows.

RKO | Crypto Paper-Trading Desktop Prototype
Python, SQLite, pywebview, QtWebEngine | In Development
- Defined requirements and iterated on the interface for a crypto paper-trading desktop prototype.
- Used AI-assisted prototyping for BTC/ETH paper accounts, a SQLite trade ledger, and CSV exports.
- Worked on take-profit/stop-loss controls, cost-aware simulations, and automated regression checks.

SKILLS

Languages: PHP, JavaScript, Python, SQL, HTML/CSS
Web and Desktop: React, Node.js, Express, EJS, pywebview
Databases and Tools: MariaDB, PostgreSQL, SQLite, Git, GitHub, VS Code
